

## Public Information on Water Conservation:

To protect water resources, homeowners in regions under drought watch are encouraged to voluntarily reduce outdoor water use and follow these tips:

- Water lawns only, when necessary, choose watering methods that avoid waste, and water in the early morning to reduce evaporation and maximize soil hydration;
- Reuse water collected in rain barrels, dehumidifiers, or air conditioners to water plants.
- Raise lawn mower cutting heights. Longer grass is healthier with stronger roots and needs less water.
- Use a broom, not a hose, to clean driveways and sidewalks; and
- Fix leaking pipes, hoses, and faucets.
